

## Safe Home..

*By Nancy Nichols, Vice President*

We like to think of our homes as a safe refuge. A proper home or building inspection gives the buyer/owner an awareness of unsafe conditions. They may be environmental conditions or physical hazards.

Most people can name environmental hazards such as asbestos and lead based paint. Although asbestos is a known health hazard, it is most dangerous when in a form in which it can be inhaled or readily ingested. Lead-based paint is most dangerous when peeling or in the form of dust from friction (old windows, for example) and impact (old doors), or in soil that is accessible to children.

## Message From The President

*By John Turner, President*

We are so blessed to have plentiful work and the ability to do it. We are also super lucky to be in our new Bedford, NH offices. It is delightful to be so convenient for our clients. Please consider joining us for our Open House from 3-6 pm on Friday, February 3. Don't forget – "Ribbon cutting" at 3:30pm!

Next weekend will be fun. After our Open House event on Friday, New Hampshire Catholic Charities is hosting their annual "Mardi Gras" event. Check it out at: <https://www.cc-nh.org/mardigras>.

New Hampshire Catholic Charities is near the top of my list of favorite charitable organizations. New Hampshire Catholic Charities will touch one in 12 New Hampshire lives this year. It is fascinating to realize that so many people are hungry or need care and support in our amazing state.

As though you didn't have enough reasons to attend, my personal favorite DJ Greg Kassapis of NRG Entertainment (check out: <http://www.nrgentertainmentco.com/>) will be leading us on the dance floor. Really it's a worthy cause, it's one of my wife Renee and my favorite annual dates, and as a result I hope you join me at their annual Mardi Gras gala.

If you are unable to join us on February 4 possibly you could consider a contribution directly to them at: <https://www.cc-nh.org/>

Let us help you make your building dreams come true in 2017. Our engineers are ready and eager to help!

## Project Spotlight - "Creating the Dream Team"

The home owner and his family for this 2016 Cornerstone Award-winning design have always had the passion and talent for the sport of basketball. When the home owner found himself in a position where he could act on owning his very own indoor basketball court; he needed to find the people who could make it happen. First, he contacted a well reputable local builder, John Flynn (John Flynn Builders LLC), who entailed reached out to Team Engineering and Terrain Planning & Design.

A quick survey of the property was taken and the most practical location for the basketball court was determined. The homeowner assumed an attached addition to the existing home would be the best location. After performing a detailed survey of

the property, it was determined that a detached building at the head of the drive would be most practical and economical
