

A new addition to our Team

By John Turner, President

It gives me great pleasure to announce the addition of Dan Martel to our engineering team! Please let Dan know how he can help you. Check out his resume:

Areas of Expertise

Dan Martel is a Licensed Professional Structural Engineer working primarily in New Hampshire and Massachusetts, specializing in building structural design, rehabilitation, and construction. As the Senior Structural Engineer at Team Engineering, Dan leads the technical efforts of Team's structural design staff. Dan provides oversight and Quality Assurance, acting as the Engineer of Record on most of Team's structural projects.

Qualifications

Our company has provided inspection and consulting services on over 10,000 buildings in the last 20 years. Dan specializes in the rehabilitation and reconstruction of existing and historic buildings, and also has extensive experience in bridge repair and design.

His portfolio includes the rehabilitation of multiple mill buildings in Lawrence, Massachusetts, bringing historic structures into modern code compliance. Dan has also designed retro-fits of existing buildings, accommodating medical office, restaurant, retail, and industrial uses. He has also designed, inspected, and repaired dozens of bridges throughout New England, working for State and Municipal bridge owners. Dan has performed commercial structural Property Condition Assessments on both sides of real estate transactions.

A Classic Team Success Story

Our good friends at CRJ (Community Resources for Justice - <http://www.crj.org/>) have accomplished what they set out to do a number of years ago – create the first Federal Inmate transition home in Rhode Island.

As is often the case with our clients, it began with a prepurchase inspection of this former convent. We told CRJ that this building was sound and well-suited for the proposed use. They proceeded with the purchase and then began the challenge of getting another federal inmate transition home approved.

We partnered with our friends at Interiors East (<http://interioreast.com/>) to create a practical renovation plan. The most significant change was to address some critical requirements for accessible suites. George Burke (The Burke Group) then did a great job implementing the renovation plans.

Last month, they opened this facility and began serving Rhode Islanders (<http://www.crj.org/news/entry/crj-to-open-rhode-islands-first-federally-funded-re-entry-center>).

Needless to say, we are very proud of CRJ for helping people restore their lives. Please join us in supporting them by contributing at:
