SENIOR STRUCTURAL ENGINEER / PROJECT MANAGER

Join the most fun engineering team in New Hampshire! Team Engineering seeks a driven, enthusiastic engineer to join our growing, fast-moving organization. We design and inspect buildings (and other structures) of all shapes and sizes and structural design/analysis/consulting is the core of our business. The perfect candidate has strong engineering production experience and is ready to leap into a leadership role.

Team Engineering's Core Values:

- ✓ We passionately serve our clients
- ✓ We strive to deliver excellence
- ✓ We embrace responsiveness, efficiency, and collaboration
- ✓ We give to our community
- ✓ We value teamwork, innovation, and continuous improvement
- ✓ We seek a fair profit/price
- ✓ We value family and fun

Requirements:

- Professional Engineer in New Hampshire, with reciprocity available throughout the Northeast. Professional Structural Engineer in States where discipline is required (e.g. Vermont)
- 10-15+ years of full-time professional experience in building structural design, with exposure to other building engineering and science disciplines (e.g. architecture, envelope, mechanical) a plus. Experience should include new building design and existing building analysis. We are building renovation experts.
- Intimate knowledge of relevant building codes and standards for all building materials and components: steel, wood, concrete, masonry, and cold-formed steel; gravity, lateral, and foundation systems.
- Proficient with structural design software such as STAAD or RISA. Experience with Revit a plus.

Responsibilities:

- Project and client manager. We work for architects, design-build contractors, property managers, building/homeowners, and homeowner associations.
- Perform quality assurance on calculations and plans. Act as the structural engineer of record on the majority of our structural design projects.
- Coach and manage a staff of 5+ engineers performing design and analysis. Coach and inspire younger staff to develop. Manage company workload for all structural projects.
- Perform feasibility studies and consultations with written reports. Help building owners understand their buildings, and the opportunity to renovate.
- Solicit new clients, develop business, and prepare proposals. Network with colleagues through professional and technical societies.
- Engage directly with clients, contractors, and industry colleagues.

Team Engineering offers competitive salaries, as well as great benefits such as health and dental insurance, retirement savings, education and training reimbursement, quarterly Team Fun Days, paid holidays, and profit sharing.

Please send your resume and letter of interest to Dan Martel at dmartel@myteamengineering.com.
